## Security from the Cloud

### About UiBS

UiBS is a leader in Microsoft® licensing, architecture, deployment, development, infrastructure and distribution of enterprise and mid-sized cloud solutions. UiBS, provides business technology solutions, cloud and managed services for the Shipping, Hospitality, Financial, Real Estate and Business Sector. From Microsoft® licensing services through architecture, deployment, software development and distribution of unified communications to enterprise and mid-sized public and private cloud solutions, UiBS has shown proven real world expertise with worldwide reach in the past decade.

### About UiBS Scfs Microsoft Azure CloudPlatform

UiBS Scfs and Microsoft Azure are the experts cloud providers of information security solutions. We deliver the industry's only advanced Security-as-a-Service platform that's simple to deploy and transformational to use. For years, UiBS Scfs and Microsoft Azure have been recognized as a leading managed service provider of business email and network security services. UiBS Scfs Microsoft Azure cloud platform host's, secures and monitor's the information assets of thousands of large enterprises and regulated businesses utilizing our proprietary security software. By tirelessly safeguarding our customers most important information, we enable growth-minded leaders to pursue their business ambitions without security worry.

"UiBS Scfs is a joined partnership with SilverSky to provide cloud financial solution based on Microsoft Azure platform. UiBS Scfs is the ultimate leader in addressing both the compliance and security needs of enterprise customers. Its best-in-class data centers and processes, coupled with its extensive know-how in evolving compliance requirements, set it apart from its competitors."

### Our Mission

UiBS Scfs tirelessly safeguards your most important information to enable you to pursue your business ambitions without security worry.

### What We do

From small businesses to global enterprises, the burden of maintaining business-critical communication and network security infrastructures is becoming overwhelming. Due to rising costs, greater complexity and proliferating compliance requirements, companies are shifting these services to the cloud to achieve the expertise, reliability and scalability that they need to become more agile and strategic in running their core business.

For the past 10 years, UiBS Scfs has been the trusted market expert for secure cloud services. We have helped thousands of customers reduce the risk, complexity and cost associated with securing corporate communications and infrastructure. UiBS Scfs is revolutionizing security and collaboration services in the cloud. We are making these services simpler to set up, easier to use and more cost effective to run, so that you can focus on your core business with greater peace of mind.

### Happy Customers

A growing customer base includes more than 6,000 customers from Fortune 500 to small-medium businesses across all industries, including financial services, manufacturing, transportation, entertainment, healthcare, retail, hospitality and government.

# UiBS Scfs Cloud Financial Services Overview

## Security for Financial Institutions

UiBS | SilverSky's mission is to make security easily available and affordable for all financial institutions in all parts of the world. Our information security services networks of more than 1,800 financial institutions globally has been pulled for more than 11 years. UiBS Scfs's centralized security is a complete end-to-end solution. We provide the multi-layered technology, security engineers, data centers, bandwidth, disaster recovery, certifications, processes, and redundancies required for a complete security infrastructure.

### UiBS Scfs Leadership

Chief Executive Officer:  
Tim Harvey

General Manager:  
Polys Yiannoudes

Chief Financial Officer:  
Andrew Lazarus

Chief Technology Officer:  
Andrew Jaquith

Senior Network Engineer:  
Lewis Loizou

Senior Cloud Developer:  
Paul Shirley

### Benefits

- Reduce complexity and costs: more stable IT spending, elimination of costly upgrades, lower business and compliance risks
- Achieve 100% availability and reliability: unparalleled experience managing millions of email boxes with financially backed SLA commitments
- Eliminate migration risks: extensive 16+ years of messaging migration experience with no risk of cost overruns or missed completion dates
- Enjoy expert ongoing support: included 24x7x365 support, monitoring, alerting and reporting with Europe-based Level 2 and 3 support technicians

### UiBS Scfs Solution at a Glance

#### Email Protection Services

- + Email Data Loss Prevention (DLP)
- + Target Attack Protection (TAP)
- + Email Encryption
- + Email Security
- + Email Archive
- + Email Continuity
- + Archive Anywhere

#### Network Security Services

- + Security Device Management
- + Event Monitoring and Response
- + Vulnerability Management
- + Log Management
- + Web Security

#### Managed Application Services

- + Exchange
- + UiBSinbox
- + Lync
- + SharePoint
- + Office 365
- + Mobile Device Management

#### Managed Security Services

- + Event Monitoring and Response
- + UTM Management
- + Network Device Management

## Industry Tested

UiBScfs is held to the most stringent third-party and industry standards to meet your compliance needs.

UiBScfs is the only major cloud messaging provider under strict FFIEC oversight

## Microsoft Partner

Gold Certified Partner with Microsoft Competencies in Hosting solutions, and member of TAP

Security infrastructure polices, people and physical premise meet stringent guidelines for maintainable security of IT infrastructure

Certified control policies and procedures against industry standards

QSA and ASV certified. PCI sets standards for encrypted transmissions, vulnerability scans, logical and physical access controls, activity monitoring, and more

## What We Offer – the UiBScfs Microsoft Azure Cloud Platform

UiBScfs provides one of the world's most comprehensive Security-as-a-Service platform to empower and accelerate your business through a single-source trusted partner. UiBScfs's suite of enterprise-grade cloud services are engineered from the ground up with best-in-class security built in. The Microsoft Azure cloud platform provides all you need to secure, monitor and manage your critical email communications and network infrastructure. The heart of the platform is a powerful Management Console that provides a unified interface and policy engine for greater visibility of operations and efficiency of administration.

## Our Technology

The UiBScfs Microsoft Azure cloud platform is the only solution to bring together SaaS suites for both email and network protection and complement them with leading managed services. Manned by more than 50 certified security experts providing 24x7 monitoring, alerting and reporting, the UiBScfs Microsoft Azure security operations center (SOC) serves as the foundation for delivering and securing our cloud email and network security products and services. By leveraging our cloud, you can reduce cost, complexity and risk through UiBScfs's unique combination of high touch service, best-of-breed technology and unmatched security expertise.

## Our Carrier-Grade Infrastructure

The UiBScfs Microsoft Azure cloud platform is built to meet the mission critical needs of the most demanding global enterprises. No single point of failure exists within the architecture and all hardware and software processes have failover protection to provide complete service redundancy. The architecture uses load balanced message routing and queuing, clustering, and redundant interconnection for maximum service availability.

## UiBScfs Microsoft Azure Cloud Platform

UiBScfs's Microsoft Azure Cloud platform three distributed data centers feature restricted access, surveillance, redundant HVAC air filtration systems, waterless fire suppression systems, raised flooring, and uninterrupted power supply systems with diesel backup generators. Our network operations staff monitors the entire UiBScfs Microsoft Azure cloud infrastructure 24x7 year round.

UiBScfs's Microsoft Azure cloud facilities and processes undergo continuous quality assessments, with rigorous third party attestations including annual AICPA SOC 2, PCI, and Verizon Cybertrust security audits. Moreover, UiBScfs is the only major cloud messaging provider under FFIEC (Federal Financial Institutions Examination Council) oversight, which requires UiBScfs to operate within the same stringent security guidelines as banks. As a result, you gain superior cloud services through all these certifications.

### Analyst Approved

UiBScfs is featured in research by leading independent research firms for both cloud messaging and security.

"Top Player" in Hosted Exchange Market for 6 consecutive years

2011 "Best Complementary Security Services" for Hosted Message Security

Magic Quadrant for MSSPs, North America, Q4 2011

Leader in Q1 2013 Emerging MSSP Market Forrester Wave

### Email Protection Suite

UiBScfs's enterprise-grade Email Protection Suite can be implemented collectively or a la carte with other existing solutions, and it seamlessly integrates with any cloud or on premise email system, including UiBScfs's award-winning managed Microsoft Exchange service. UiBScfs's Email Protection Suite offers the industry's most comprehensive and flexible email security and archiving capabilities to empower workers with greater productivity.

- + Email Security: advanced, multi-engine anti-spam and anti-virus
- + Email DLP: industry's most powerful and easy to use email data loss prevention
- + Email Encryption: intuitive policy-based and user-level message encryption
- + Email Archive: comprehensive eDiscovery, compliance archiving, and mobile archive access
- + Email Continuity: always available email access and usage even when email server is down

### Network Protection Suite

UiBScfs's market leading Network Protection Suite provides comprehensive network perimeter security to easily monitor and prevent security risks.

- + Web Security: innovative network-based web content filtering for Mac and Windows devices
- + Mobile Device Management (MDM): security policy enforcement, application management, and Bring-Your-Own-Device (BYOD) support
- + Vulnerability Management: assess and remediate weak spots in network
- + Log Management: core security for intrusion and threat analysis

- + Brand Protection: counter-act malware and phishing threats that use your brand
- + Event Monitoring and Response: 24x7 proactive network security vigilance
- + UTM Management: unified threat management (UTM) device management, intrusion detection/prevention service (IDS/IPS), firewall and virtual private network (VPN) management

## Our People and Services

People make the difference at UiBScfs. From our seasoned executive leadership team (authors of 7 books on security) to our expert security engineers (CISSP, CCNP, CCSE, MCSE, and more), the depth and breadth of knowledge found at UiBScfs is unmatched anywhere else in the industry—and this is what sets our services apart. Whether you need to migrate your legacy mail servers to the cloud or want to augment your internal network security, we are ready to help. Our team of experienced, certified professionals can create tailor-made service packages to add value for your business.

Our professional services include:

- + Email and archive migration
- + Email policy implementation
- + Penetration testing
- + Vulnerability assessment
- + Compliance assessment
- + Risk assessment

## Why Choose UiBScfs

### We lower your risks in the cloud

- + 24x7x365 live monitoring and alerting from a team of certified security experts.
- + FFIEC oversight entails same regulations and scrutiny as a bank.
- + Proven, robust Fortune 100-grade infrastructure that scales easily and rapidly.

### We reduce your complexity and costs

- + Low, predictable operating expense based on elastic usage.
- + Financially backed SLAs that offer 100% guaranteed availability.
- + Eases compliant burden with SEC, FINRA, HIPAA, SOX, FERPA and FRCP requirements.

### We elevate your workforce

- + Focus internal IT on strategic, revenue generating projects.
- + Achieve greater reliability, security and performance for all users to boost productivity.
- + Gain superior support and service expertise for all security and messaging needs.

## Targeted Attack Prevention

UiBS Scfs's Targeted Attack Prevention service provides a powerful defense against targeted attacks, spear and "longline" phishing and zero-day exploits

### Data Breach Preparedness

Cybercrime is a growth industry. Companies store ever-larger quantities of sensitive data on a wider variety of computing devices, stretching defenses and increasing the risk of data breaches. As a result, attackers have more opportunities to steal sensitive company data than ever before.

This is where UiBS Scfs's Targeted Attack Prevention solution can help companies' best guard against breach exposure.

### TAP stops malicious attacks before intrusion

"While some companies will be targeted regardless of what they do, most are targeted due to what they do not do!"

### UiBS Scfs's Targeted Attack Prevention (TAP) service uses advanced detection and prevention methods by testing email content in-line before end user delivery.

Email is the centerpiece of business communications. It is also the single most important entry point for targeted attacks, spear phishing, "longline" phishing, and advanced zero-day exploits. New data breaches are uncovered almost daily – any one of which can jeopardize your company, place your intellectual property at risk, and cause monetary and reputational damage in minutes.

Cyber-criminals are increasingly aggressive, well-funded and persistent. No company can ever be perfectly safe from the most determined attackers. But UiBS Scfs's Targeted Attack Prevention (TAP) service provides an essential margin of safety for customers seeking to prepare for specific and unusual attack scenarios. TAP arms CIOs and IT managers with new, comprehensive detection techniques to reduce their company's attack surface and vulnerabilities. And because we address the entire kill chain through our complementary portfolio of managed services, we offer more protection than any other solution provider.

#### Stops Targeted and Zero-Day Attacks

- + Through UiBS Scfs's research, TAP uses advanced sandboxing, dynamic real-time analysis, and machine learning techniques for rapid message inspection using a sans-signature approach

#### Uses "In-line" Inspection and Prevention Techniques

- + Deployed "in-line" to stop payloads before delivery
- + Inspects messages, metadata, links, and all attachment types and returns minimal false positives

#### UiBS Scfs's Service Portfolio Addresses Multiple Vectors

- + Full access to the attack kill chain through TAP: Intrusion Detection/Prevention, Web Security, Employee Training and Cross-service Correlation
- + UiBS Scfs's Labs + 3 Security Operations Centers
- + Threat Correlation and Outbreak Intelligence

89% of worldwide breaches identified in 2013 could have been prevented – sparing companies from monetary and reputational damage.

### TAP in Action – Access to the Entire Kill Chain

### Benefits of UiBScfs’s Groundbreaking Targeted Attack Prevention

+ TAP significantly reduces security exposure for companies and protects them from reputational damage and intellectual property theft from cyber threats with fast and effective attack detection, containment, and response.

+ UiBScfs’s innovative analysis engines and sandbox simulators quickly identify zero-day malware, malicious network attack activities. TAP pinpoints the probability of an imminent attack or zero-day exploit, confirms the attack is in progress, and suspends message traffic.

+ TAP generates dynamic threat analysis reports for deep inspection and counter-measure activities. And, IT admins can conduct real-time quarantine and remediation of zero-day email attacks.

+ UiBScfs Targeted Attack Prevention fully integrates with and enhances all UiBScfs Email Protection Service solutions for layered defense and real-time correlation. TAP can be deployed rapidly and is easily configured and controlled via the intuitive UiBScfs Management Console.
